“Flack Pine”
Sale Area: 91 Acres
Tract # 8001-04-24

Location: Township of Washburn / Bayfield County, Wisconsin

Comp-Stand	Town	Range	Section	Zone	Acres
160-1	48N	6W	16	NA	12
160-5	48N	6W	16	NA	24
160-10	48N	6W	15 &16	NA	55

SPECIES	VOLUME
Red Pine	1400 CDS**
Aspen	25 CDS

Minimum Acceptable Bid: \$45,237.50

- Red pine conversion rate will be 2.250 tons per cord.
- Aspen conversion rate will be 2.250 tons per cord.

****Red Pine total contains approximately 41 mbf. Average Red Pine diameter is 10.3 in.**

****Red Pine volume contains approximately 5 cords of Jack Pine.**

Total Sale Area: 91 acres

Harvest Requirements

All Sale Units: Cutting requirements are listed on the sale map.

Design Features and Mitigation Measures

The following requirements apply to all stands:

- Seasonal operating restriction on all stands. No operation from March 1 through July 31.
- Do not harvest trees or operate equipment across **orange** paint line.
- Use of heavy equipment during excessively wet weather will be limited. This will be controlled during project administration.
- Do not pile slash within or move slash into wetlands and/or RMZs.
- Discourage the spread of non-native invasive species, especially spotted knapweed and common buckthorn through proper cleaning of logging equipment before entering and leaving the sale area.
- Reserve all snags unless they pose a safety concern. A maximum of 10 snags per acre is desired.
- All pine products cut between May 1 and September 1 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed prior to May 1 of each year.
- Decking on Town Roads is prohibited without written permission from the Town.
- To deter motor vehicle use of closed roads the Washburn District utilizes logging slash/stumps/debris for 100 feet beyond the berm. GNA sales will need to be consistent with current Washburn District Forest Service practice.
- Chequamegon-Nicolet Forest Plan requires that all native surfaced approaches to paved or graveled roads have 100 ft. of gravel, 6 in. deep and 12 ft. wide put down when used during non-frozen conditions.
- All landings and skid trails will be blocked to vehicular access and possibly re-seeded at the conclusion of use if needed.
- Purchaser required to post signs on USFS roads alerting recreationalists of thinning activities.
- All road maintenance and rehabilitation post-harvest is the purchaser's responsibility. A sample contract including road maintenance specifications can be obtained by request.
- The location and clearing widths of all Temporary Roads shall be agreed to in writing before construction is started. "Temporary Roads" are roads other than Specified Roads that are constructed by Purchaser for the purpose of harvesting included timber.
- Temporary Roads shall have the road base constructed to a width of 12 feet or narrower, and with vegetative clearing of trees and brush not to exceed a width of 25 feet. Exceptions to the 12-foot maximum width of the road base may be granted by the sale administrator. Exceptions would typically be granted for sections of temporary roads where tight turns, curves, and terrain create a need so that trucks and equipment can be operated safely.
- Road maintenance and restrictions details are listed in the timber sale contract. Please contact a forester listed on the sale map for more information.
- If contractor's haul route crosses the Iron River ATV/Snowmobile trail east of the sale, contractor will post signs on both sides of the road/trail intersection notifying trail users to slow down and be aware of logging activities.

**Stand-specific road requirements:**

- No new road building allowed, only re-opening existing roads.
- Temp road 2 (north of Tudor Road) to be bermed to prevent access during the March 1st to July 31st restriction and upon completion of sale operations. All other temporary roads and other roads noted in the prescription for use in sale will be closed when sale is completed.

Stand-specific slash requirements:

- All slash 100 feet from the edge of all roads and trails should not exceed 3 feet in height.
- Visible portions of timber harvesting, or other vegetation removal areas should receive the primary emphasis for slash treatment.
- Keep slash back at least 10 feet from FR 239.

Additional Requirements

- Sale will be billed using mill ticket system.
- No bid bond required, a performance bond of 15% of the total sale bid value will be required.
- 3-year contract period. Contract ending date of **December 31, 2027**.
- **NO SALE MAY BEGIN WITHOUT PRIOR NOTIFICATION AND AN ON-SITE MEETING WITH A SALE ADMINISTRATOR.**
